

Solution:

(1)

(a) The cash could be calculated as follows:

$$\begin{aligned} \text{Cash} &= \text{Total assets} - \text{Non cash assets} \\ &= €27,739 - €24,860 = €2,879 \text{ million} \end{aligned}$$

Thus, the total cash is given by €2,879 million.

(b) By using balance sheet equation, we have

$$\begin{aligned} \text{Stockholders' Equity} &= \text{Assets} - \text{Liabilities} \\ &= €27,739 - €21,512 = €6,227 \text{ million} \end{aligned}$$

Thus, the total stockholders' equity is given by €6,227 million.

(2)
