

Solution:

(1)

$$EPS = \frac{\pounds 5,458 \text{ million}}{5,099 \text{ million shares}} = \pounds 1.07 \text{ per share}$$

(2)

$$P - E \text{ ratio} = \frac{\pounds 14.72 \text{ per share}}{\pounds 1.07 \text{ per share}} = 13.76$$

(3)

$$\text{Dividend Per share} = \pounds \frac{3,406}{5,099} = \pounds 0.67 \text{ per share}$$

$$\text{Dividend} - \text{Yield} = \frac{\pounds 0.67 \text{ per share}}{\pounds 14.72 \text{ oer share}} = 4.55\%$$

(4)

$$\text{Dividend} - \text{Payout} = \frac{\pounds 0.67 \text{ per share}}{\pounds 1.07 \text{ oer share}} = 62.62\%$$
