

**Solution:**

$$A = \$27,388 + \$8,189 = \$35,577 \text{ million}$$

(balance sheet equation)

$$B = \$10,655 - \$841 = \$9,814 \text{ million}$$

(revenues – income)

$$C = 1,702 + 841 - 510 = \$2,036 \text{ million}$$

(formula for ending retained earnings)

$$D = \$8,482 + \$21,015 = \$29,497 \text{ million}$$

(balance sheet equation)
